*IPS stands for In-Plane Switching, a type of LED display technology (a form of LCD).

Unless otherwise stated, all performance figures are based on theoretically achievable values. Actual measurements may vary under real-world conditions.

The actual transfer speed of USB 3.0, 3.1, 3.2 and/or Type-C depends on many factors, including the processing speed of the host device, file characteristics and other factors related to the system configuration and your operating system environment.

* Ergebnis von Mobile Mark 2014 Office Productivity.

*The testing regimen includes the requirements of both military-grade standards and ASUS quality tests, and varies depending on device. MIL-STD-810 testing is conducted on selected ASUS products only. These tests do not demonstrate fitness for military use, or adherence to US Department of Defense (DoD) contract requirements. Similarly, the test results should not be considered an indication or guarantee of future performance under the specified test conditions. Damage occurring under these test conditions – or any attempt to replicate them – would be considered accidental, and would not be covered by the standard ASUS warranty. Additional coverage is available with ASUS Premium Care.
