What to consider when choosing your MacBook Air.

Configure your laptop on the next step.

Apple M2 chip

M2 brings incredible performance and capability so you can blaze through everyday activities, multitask across apps, pursue your creative passions, and play your favorite games

- Run multiple apps and edit thousands of photos or 4K video
- Up to 12x faster than fastest Intel-based MacBook Air³
- Supports one external display

Unified Memory

Faster and more efficient than traditional RAM, unified memory is integrated within Apple silicon so apps can quickly share data between the CPU, GPU, and Neural Engine

- Run multiple apps at once while performance remains fast and responsive
- Add memory to run more apps simultaneously for faster, more fluid multitasking
- MacBook Air can be configured with up to 24GB of memory

Storage

Solid-state drive (SSD) storage is the amount of space your MacBook Air has for your documents, photos, music, videos, and other files

- Delivers exceptional performance and speed when you start up, launch apps, open files, and browse libraries
- MacBook Air can be configured with up to 2TB of storage
